Fires highlighted in yellow have submitted a final ICS-209

Evening Brief

Date Stamp: Friday July 7, 2017

Weather Summary

...HIGH RISK for Scattered Monsoonal Thunderstorms Fri-Sun...

Hot temperatures will continue through the weekend across the Great Basin under strong high pressure with most valleys approaching or exceeding 100 degrees.

Monsoon moisture has entered the Great Basin producing isolated to scattered thunderstorms yesterday and is expected to increase in areal coverage today through the weekend and into next week. Storms will be a mix of wet and dry and be faster moving on the western side of the ridge across Nevada the next few days. Deeper moisture will work its way north later this weekend into next week with better chances of more widespread wetter storms.

We have issued **High Risk** for much across much of Nevada, Utah and southwest Idaho for today and Saturday. **High Risk** has also been issued for Sunday but limited to the triple point of UT/NV/ID as storms further south and east will likely transition to wet.

Preparedness Levels

Current:

Great Basin	4
National	3

Great Basin Fire Potential Summary

Fine fuels, which have been the main contributor to fire spread early this season in the north and west, continue to dry out quickly across the Great Basin. Higher than normal fine fuel loading and continuity exists over the northern half of the Great Basin. ERCs have now climbed to the 90th-97th percentile over southern and eastern NV/UT and the AZ Strip and are **near record highs in some areas**, with more advanced fire behavior on ongoing fires in southern Utah.

Further north ERCs also continue to increase and dry out...mostly in the 60th to 70th percentile with a few drier pockets. Sagebrush live fuel moisture is still near normal across the northern and western portions of the Great Basin, but is on the downward trend. Sagebrush live fuel moisture across Central/Southern NV/UT has dropped significantly to below normal and in some areas is approaching record lows.

Towards the end of the 7-Day period, we do expect to see some moistening of fuels, especially in southern areas where we could see a return to the **"Moist"** category.

Resources:

- Crews: 14 T1 IHCs in GB, 14 committed.
- T1 IMT Team 2 - Martin committed to Brianhead fire.
- T2 IMT Team 6 – Chadwick committed to Earthstone fire.
- T2 IMT Team 7 – DeMasters committed to Brianhead fire.
- T2 IMT Team 3 – Rohrer committed to Dry Gulch fire.
- T3 IMT Thaler committed to Dry Gulch fire.
- T3 IMT Hecht committed to Limerick fire.
- Local IA resources are at drawdown for UT and NV.
- GBCC has committed an estimated 70+ type 3, 4, 6 engines.
- 0-T1 and 0-T2 helicopters are available in GACC.

Great Basin Fire Activity (from Irwin): Moderate Activity

New Fires and Acres: 26 fires for 417.2 acres. 92,167 acres large fire growth.
